

Run The Application

- Open anaconda prompt from the start menu
- Navigate to the folder where your python script is.
- Now type “python app.py” command

```
(base) C:\Users\DELL>cd C:\Users\DELL\Hand_Written_Final  
(base) C:\Users\DELL\Hand_Written_Final>python app.py
```

Navigate to the localhost where you can view your web page

Upload an image and see the predicted output on UI your page and output looks like:
